*...when I found out about the pricing structure for AB Tutor Control I almost thought it was too good to be true. It looks like I've found the best of both worlds – reasonable pricing and excellent performance. Thanks – after so many years of looking the search is over.*

Stephen Lehrer, Technology Facilitator  
Bristol-Warren (RI) Regional School District  
Warren, RI, US

## Making Networked Classrooms Work

## KEY FEATURES

- Auto-reconnect when connection lost
- Create defined classroom groups
- Either connect to all clients or only to pre-set groups

### INTERNET CONTROL

- Block ports to prevent any Internet activity
- Limit web browsing to specified sites
- Black-list specific sites
- Filtering by keyword/wildcard

### APPLICATION CONTROL

- Limit applications that can be launched
- Specify applications that cannot be run
- Close down inappropriate applications

*Having implemented AB Tutor little over a year ago, it has become an invaluable part of our desktop support toolkit: it enables one technician to provide support to multiple users simultaneously. It has also proved popular with teaching staff to monitor students, to ensure they are on track, with features such as internet and application control policies. Purchase, installation and use of the product is very simple. It is obvious that the product is custom driven, as a number of suggestions posted on the website are frequently included in product updates. AB Consulting are a pleasure to deal with, technical support is excellent.*

Michael Eastaugh, Network Manager  
Bushey Meads School

Below are screen shots of the AB Tutor Control teacher console, showing the main control panel and demonstrating a watch of 9 student screens.
