

## Trusted, Reliable and Affordable Messaging and Collaboration for Business

### Key Features

- Open standards design (SyncML, IMAP, POP, SMTP, DomainPOP). Does not require a server Operating System.
- Solid security (DKIM for sender authentication, spam trap capable, grey listing, white listing, SSL/TSL, proactive malware prevention via SecurityPlus plug-in).
- Custom scheduling and mail queuing for more flexible outbound mail management.
- Mobility enabled (SyncML, Sync4J for PIM functionality, P-IMAP, web client sync to handheld).
- Groupware enabled (Mail, Calendar, Contacts, Tasks, Notes, Journals).
- Private IM via ComAgent application.
- Rapid failure recovery.
- Multiple domain support and integrated web administration.

The MDAEMON® email server is designed to meet the needs of small-to-medium businesses that require reliable and feature-rich messaging without expensive administration and support. MDAEMON improves business communications through secure email, collaboration, remote and wireless access, and data synchronization. It simplifies email by offering enterprise-class features, yet requires minimal training and support. MDAEMON can be up and running in minutes. And after installation, MDAEMON requires almost no maintenance, letting businesses concentrate on business, not email.

The easy to use web mail client enables users to access their email from anywhere with a network connection.

## Key Benefits

**Highly Secure.** Proactively provides protection from spam, viruses and other malware (full protection with SecurityPlus).

**Collaboration.** Mail, Calendar, Contacts, Tasks, Notes and Journal. Supports Microsoft Outlook® via the Outlook Connector application.

**Easy Installation and Maintenance.** MDAemon can be installed in minutes and does not require expensive, dedicated and certified resources to support the email platform.

**Remote Access.** Users can access their email from anywhere using the WorldClient web mail application included with MDAemon. Administrators can use the WebAdmin application.

**Solid Performance.** MDAemon has been supporting the email needs of thousands of customers in over 90 countries for over 10 years.

**Designed for Mobile Users.** SyncML open-standards protocols, remote handset synchronization and web mail capability offers users total flexibility.

## System Requirements

- Computer with Pentium III 500 MHz (or higher) processor (Pentium 4 2.4 GHz or higher recommended)
- 512 MB of memory (1 GB recommended)
- Typical Hard disk space required: 100MB, additional space for any mail to be stored
- Microsoft Windows XP/2000/2003 operating system
- Internet Explorer 5.5 or higher
- Ethernet Network Card
- TCP/IP network protocol installed
- Internet or Intranet communication capabilities.
